SUMMARY

Adaptable Full Stack Software Engineer skilled in JavaScript, TypeScript, React.js, Next.js, Supabase, and Python. Contributed to notable projects as well as leading the development of "The Kennel" for Bulldog Community Gaming. Combining precision with innovation, I focus on building scalable, user-friendly applications. Proficient in using tools like React Hook Forms, Zod, Tailwind CSS, and GitHub for version control. Driven by a passion for innovation, I thrive in collaborative, Agile environments, actively participating in code reviews and implementing best practices for continuous integration and deployment.

SKILLS

Languages/Database: JavaScript, Python, HTML5, CSS, Dart, MongoDB - NoSQL Frameworks/Libraries: React.js, NextJS, Tailwind CSS, Supabase, Express.js, Node.js, Mongoose, Flask, JQuery Tools/DevOps: Github, Gitea, Visual Studios Code, Google Docs, Slack, Vite.js, Postman, Figma, Linear Certifications: Coding Temple - Full-Stack Software Engineer (JavaScript, Python, CSS, HTML5, Flask, React.js, SQL), Co.Lab - Software Developer

EXPERIENCE

Senior Developer - The Spartan IT Group LLC (Remote)

06/2024 - Present

- Spearheading the development of "The Kennel," a dynamic e-commerce website for Bulldog Community Gaming using **Next.js**, **Supabase**, **React Hook Forms**, **and Zod**, and **GitHub** for version control.
- Collaborating with cross-functional teams to deliver tailored software solutions for local businesses.
- Responsible for creating user-friendly interfaces, managing product listings, and integrating event scheduling features.
- Ensured responsive design and performance optimization across different platforms and devices.
- Led projects from concept to completion, ensuring quality and innovation at every step.
- Utilizing **Linear** for project management to track progress and ensure timely delivery of features.

Software Developer - Co.Lab (Remote) - Break Buddy & Matrimoni

09/2023 - 04/2024

- Developed and contributed to "Break Buddy" and "Matrimoni" projects
- Utilized **React.js**, **Tailwind CSS**, and **Material-UI** for seamless and visually appealing user experiences.
- Deployed "Break Buddy" on Vercel, actively involved in CI/CD processes for efficient updates.
- Conducted **code reviews**, ensuring high-quality code and adherence to coding standards.
- Implemented version control using GitHub and collaborated in Agile development methodologies.
- Utilized **Firebase** for secure **user authentication** in applications.
- Gained hands-on experience in full-stack development and responsive web design techniques.

Restaurant/Hotel Chef - Marriott Magnificent Mile, Chicago IL

08/2019 - Present

- Assisted with the development of full, tasting and special event menus to meet all establishment needs and maintain strong customer levels outlined by Marriott Brand which resulted in high customer satisfaction scores.
- Plated every dish with attractive flair to meet strict restaurant standards and maintain a stellar business reputation.

EDUCATION

Coding Temple - Chicago, IL

02/2023 -04/2023

- Full-Stack Software Engineering

De La Salle - College of Saint Benilde - Manila Philippines

04/2010 - 07/2016

- Bachelor of Science in Hotel, Restaurant & Institution Management (Major in Culinary Arts)

PROJECTS

The Kennel - Bulldog Community Gaming Website_ - August 2024 - Present

Technologies: Next.js, Supabase, React Hook Forms, Zod, GitHub, Linear, Figma, Tailwind CSS

 Developed a comprehensive e-commerce platform tailored for Bulldog Community Gaming, a hobby store specializing in trading card and video gaming events.

- Implemented key features such as product listings, event scheduling, and a seamless checkout experience.
- Leveraged Supabase for real-time data synchronization and React Hook Forms for efficient form management.
- Focused on creating an intuitive user interface with responsive design and performance optimization.
- Collaborated closely with stakeholders to ensure business needs were met, while managing project timelines and tasks using **Linear**.

The Spartan IT Group Company Website - July 2024 - Present

Technologies Typescript, Supabase, NextJS, React Hook Form, TailwindCSS, Figma

- Leading the development of the company website to showcase The Spartan IT Group's services and solutions.
- Collaborating with a team of developers, a product manager, and a designer to ensure a high-quality and innovative user experience.
- Building features that highlight the company's mission to deliver tailored software and technology solutions for local businesses.
- Ensuring the website is user-friendly, visually appealing, and fully functional across various devices and browsers.
- Utilizing TypeScript for strong typing, Supabase for backend services, and Next.js for server-side rendering and static site generation.

Break Buddy - January 2024 - April 2024

Technologies: JavaScript, Tailwind, CSS, HTML, Firebase, React.js

- Developed a web app addressing challenges in remote work, enhancing social breaks for remote workers.
- Transformed breaks into social moments, promoting accountability, sociability, and healthier work habits
- Implemented features such as a **shared calendar**, **activity options**, **online meetups**, and **calendar integration**.
- Focused on improving mental, social, and physical well-being within the remote work environment.

Matrimoni - September 2023 - November 2023

Technologies: JavaScript, Tailwind, CSS, HTML, Firebase, React.js

- Produced an application that simplifies the wedding planning experience for couples. With a **venue search** feature, users can refine their venue search based on their preferences.
- Enabled real-time updates of the **pie chart** using a JavaScript library, providing users with immediate feedback on their budget distribution as they input and adjust their spending.
- Worked with UI frameworks and libraries such as **Tailwind CSS** and **Material-UI** for efficient and visually appealing designs.
